

Guides

Our guides offer simple step-by-step walkthroughs for solving common machine learning problems using best practices.

Rules for ML

Become a better machine learning engineer by following these machine learning best practices used at Google.

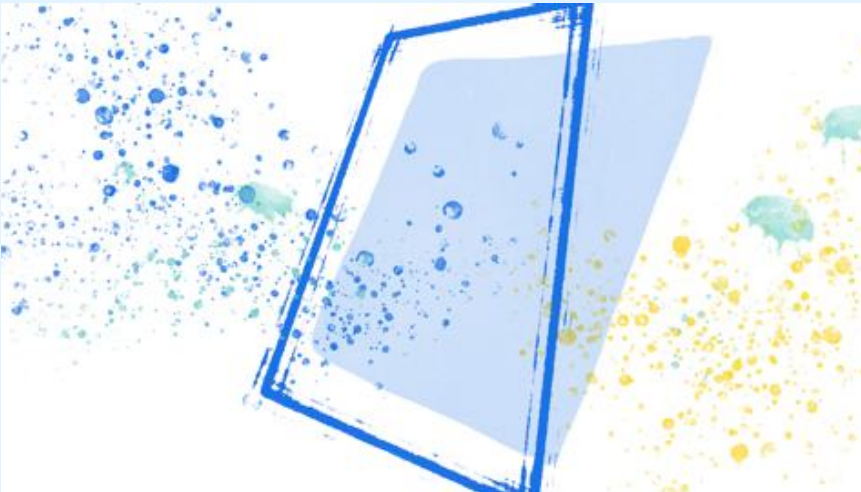

People + AI Guidebook

This guide assists UXers, PMs, and developers in collaboratively working through AI design topics and questions.

Text Classification

This comprehensive guide provides a walkthrough to solving text classification problems using machine learning.

Good Data Analysis

This guide describes the tricks that an expert data analyst uses to evaluate huge data sets in machine learning problems.

Deep Learning Playbook

This guide explains a scientific way to optimize the training of deep learning models.
