# Machine Learning

Advanced Courses

The advanced courses teach tools and techniques for solving a variety of machine learning problems.
The courses are structured independently. Take them based on interest or problem domain.

NEW

Decision Forests

Decision forests are an alternative to neural networks.

NEW

Recommendation Systems

Recommendation systems generate personalized suggestions.

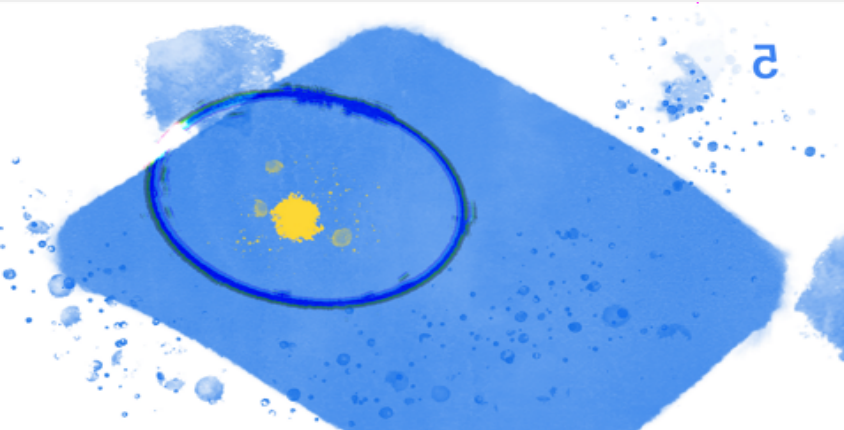

NEW

Clustering

Clustering is a key unsupervised machine learning strategy to associate related items.

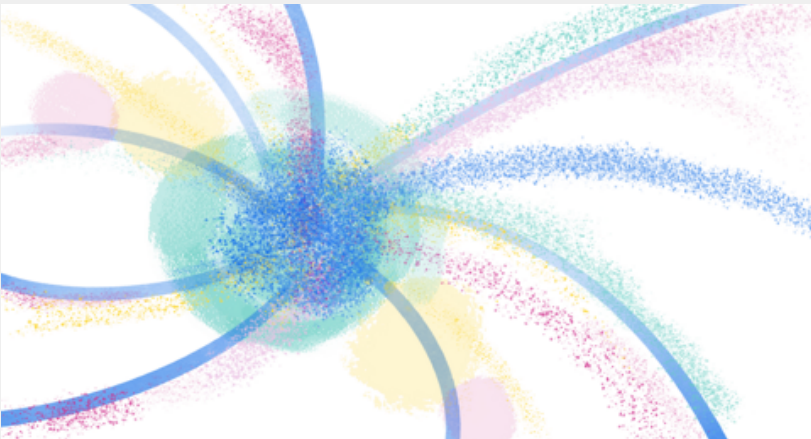

NEW

Generative Adversarial Networks

GANs create new data instances that resemble your training data.

NEW

## Image Classification

Is that a picture of a cat or is it a dog?

NEW

Fairness in Perspective API

Hands-on practice debugging fairness issues.
